

experience it?

Activity experience days.

We have hand picked a number of individual activities from our themed experience days, all of which are designed to challenge your teams, whilst offering a fixed cost solution for your teambuilding event.

Poker experience.

All show. No dough!

A unique opportunity to play like a real pro at your very own Texas Hold'Em poker tournament. You do not need any previous poker knowledge to experience this fast growing leisure activity where real money never changes hands. Best played in teams with each player winning points depending on when they get knocked out of the tournament. All the points are then added together and the team with the most is declared the winner.

Every member of the winning team receives a prize or trophy along with all individual game winners. A Blackjack and Roulette casino experience is also available.

Circus Skills experience.

Roll up! Roll up! Your chance to run away and join the greatest show on earth. Master classes in juggling, still walking, unicycle riding, tightrope and many other circus disciplines. Aaah...You can almost smell the sawdust.

Off Road Driving experience.

Now this is serious fun! Experience an amazing sensation of speed on the Grass Karts, overcome frustration on the Reverse Steer blindfold drive and pilot a Powerturn Rally Kart with no steering wheel! What did you do today?

Cyber Tag or laser clay shooting experience.

Paintball without the pain! Cyber tag guns fire harmless infra red beams that are picked up by sensors on the opposing player's gun. Each team has to develop a plan to retrieve secret documents from the other teams 'safe house' before they lose all their lives.

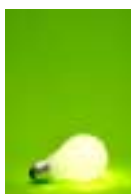

Our Laser clay shooting experience is similar to the traditional event but without the danger of live ammunition. This system uses de-activated shotguns, firing harmless infra red light at flying reusable clays.

Urban Surveillance Training experience.

London, Paris, New York, Rome... any city... any country. After a morning's comprehensive covert surveillance training, your teams scan the city streets for the surveillance target. Contact! - A positive sighting...The 'Eyeball' takes the lead and the team goes 'live'. UST is our most elite, original and cohesive team activity experience for up to 30 delegates.

Brain Gym experience.

A series of classic cerebral challenges to test even the smartest of teams! There are over 20 individual challenges to choose from including the egg launch, blind sheep, roller ball, block builder, toxic waste, semaphore and eroding island.

Some of our activity experience days can be adapted to become conference energisers .
